Passionate about computer science since the age of seven, I began my educational journey at ITT G. Giorgi, earning three CISCO certifications. After studying at Poggiolevante merit college in Bari, I pursued Computer Science at the University of Bari, enriching my resume with courses in Android, C++, Java, PHP, and a soft skills certification. I gained teamwork experience through a project for an IT company in Bisceglie. With two years of university under my belt, I joined Fincons Group as a junior developer and obtained an AWS Developer certification. In 2019, I moved to YOOX-Net-A-Porter Group, working on custom CMS and React/AWS technologies, before becoming a Full Stack Developer at [Doveconviene.it](https://doveconviene.it). Later, I served as a software engineer at SAVI Italia, focusing on testing and maintaining high code coverage in an international team. These experiences led me to embark on a freelance consultant career, driven by my eclectic interests and a desire to create.

Experience

- Freelancer** **2023-12-01 -**
Team Manager and Software Engineer
🔗 <https://msantoro.com>
Using **Vue**, **NodeJS**, **Python** and **React** over **NextJS**, I am collaborating with many big companies about Retail and e-commerce.
Following micro-teams of mid and junior developers and mantaining production web applications

SAVI Italia **2022-06-09**
Software Engineer
As a member of the International Team, using **nodejs/VueJS** my duty was to mantain with the other colleagues, the softwares and web apps related to Offers/Coupons/Cashback (mainly **code coverage** and **tests** development)

Shopfully **2021-06-09**
Full Stack Developer
As a member of the 'Platform Team', using **nodejs**, **php** and **ReactJS** over the **AWS infrastructure** (using **Serverless Framework** for the **IAAC**) I worked on internal projects that aimed to enhance the experience for our marketing team, such as the Campaign Manager; A tool used by them to create and handle all the campaigns in Doveconviene.it, calling the **google adv. api**

Yoox Net-A-Porter Group **2019-08-31**
AWS Developer
My main role in Yoox was to setup and create all the **Special Campaigns** during the year, such as Christmas or Black Friday campaign. Using **JQuery**, **ReactJS** and **NodeJS**, I had to improve and refactor the content manager software, taking advantage of my skills and certification as an **AWS Developer**.

Fincons Group **2018-03-08**
Developer
As a Junior Developer Consultant I worked for important companies around the world, using **Java (Spring)** + **Aws**. There I had the chance to certificate myself as **AWS Developer** and started my career in the **cloud**.

Education

Università degli studi di Bari Aldo Moro **2016-08-31**
unfinished Computer Science
Because I had the opportunity to start my career while I was in college, I left my studies since I felt I was already ready to work.

Projects

- Vivere senza lattosio** -
A blog regarding the Lactose Intolerance using HugoCMS
