I have been passionate about computer science since the age of seven and started my studies at ITT G. Giorgi, where I obtained three CISCO certifications. After completing my studies at the Poggiorevante merit college in Bari, I attended the Computer Science course at the University of Bari and, thanks to the college, I also participated in various courses in Android, C++, Java, and PHP. I also obtained a soft skills certification and gained experience in team working through a project for an IT company in Bisceglie. After two years at university, I began working as a junior developer at Fincons Group and obtained the AWS Developer certificate. In September 2019, I joined YOOX-Net-A-Porter Group as a developer, working with custom cms and react/aws technologies. In 2021, I started a new career as a Full Stack Developer @ Doveconviene.it. From there I moved to SAVI Italia as a software engineer in an international team

WORK EXPERIENCE

- Transcribr** (01/2022 - Present)
Founder
Thanks to my new freelance experience, I am working on a startup that aims to enhance the Learning Management Systems adding Artificial Intelligence Improvements.
- Freelancer** (12/2023 - Present)
Team Manager and Fullstack Developer
As a freelancer I am collaborating with Brain SRL, following the development of an e-commerce and coordinating the team tasks
- SAVI Italia** (06/2022 - 12/2022)
Software Engineer
As a member of the International Team, using **nodejs/VueJS** my duty was to maintain with the other colleagues, the softwares and web apps related to Offers/Coupons/Cashback (mainly code coverage and tests development)
- Shopfully** (06/2021 - 06/2022)
Full Stack Developer
As a member of the 'Platform Team', using **nodejs, php** and **ReactJS** over the **AWS infrastructure** (using **Serverless Framework** for the IAAC) I worked on internal projects that aimed to enhance the experience for our marketing team, such as the **Campaign Manager**; A tool used by them to create and handle all the campaigns in Doveconviene.it, calling the **google adv. api**
- Yoox Net-A-Porter Group** (08/2019 - 05/2021)
AWS Developer
My main role in Yoox was to setup and create all the **Special Campaigns** during the year, such as Christmas or Black Friday campaign. Using **JQuery, ReactJS** and **NodeJS**, I had to improve and refactor the content manager software, taking advantage of my skills and certification as an **AWS Developer**.
- Fincons Group** (03/2018 - 08/2019)
Developer
As a Junior Developer Consultant I worked for important companies around the world, using Java (Spring) + Aws. There I had the chance to certificate myself as AWS Developer and started my career in the cloud.

SIDE PROJECTS

- Vivere senza lattosio**
A blog regarding the Lactose Intolerance using HugoCMS
🔗 <https://viveresenzalattosio.it>
- GamerNerd**
Using the rss parser, it fetches latest news from important websites and shows it
🔗 <https://gamernerd.it>
- Vue Rss Parsify**
Rss parser client side
🔗 <https://www.npmjs.com/package/@saintbull/vue-rss-parsify>
- KalliztoCSS**
CSS Library for my own projects
🔗 <https://github.com/MatthewSaintBull/kallizto>

EDUCATION

- Università degli studi di Bari Aldo Moro** (08/2016 - 08/2018)
Computer Science
unfinished
Because I had the opportunity to start my career while I was in college, I left my studies since I felt I was already ready to work.
